

Olympia DUMBO

The renowned Workstead studio is responsible for the interior design. The Olympia DUMBO building houses 76 boutique, luxuriously furnished apartments and 38,000 square feet of recreational space invented by Workstead and rooted in the history of the area.

Workstead draws its inspiration from history in a very thoughtful way even when working on a completely new building such as the Olympia DUMBO. The interiors are to be rooted in the history of the district and this is the driving force behind the studio. Based on Olympia's location near the port of New York, Workstead came to the word "oceanic" as the leitmotif for the Olympia project. A palette of colors and textures was chosen, reminiscent of both sparkling water and the beauty of a storm at sea.

Given the history of New York Harbor as a functioning wharf, Workstead took inspiration from maritime architecture and culture. The rhythm of the parallel lines is repeated throughout Olympia, from the entrances to the mansion to the textured kitchen furniture made of maple. The architects also wanted to refer to the building's elevation pattern designed by Hill West Architects.
